

DOSING FEED ADDITIVES ACCURATELY

Professional animal husbandry requires optimum utilization of expensive additives – for the good of man and animal. Get into the accurate and reliable precision dosers from Förster-Technik.

Do you need an accurate and flexible distribution of feed additives – combined with easy handling and longevity? The precision dosers from Förster-Technik prove themselves whenever an exact, reproducible dispense of powder substances in gram range is required.

Ingenious solutions.

StarDos Maxi is based on the star wheel doser from Förster-Technik. This functioning principle is suited for free flowing and also in particular for fatty additives.

The doser can be easily mounted thus extending all feeding plants in the twinkling of an eye.

Easy to adjust.

The interval and supply time can be directly adjusted via a potentiometer. The doser only dispenses the additive in case it receives the corresponding signals from the superordinate feed computer.

TOP-DRESS DOSER STARDOS MAXI

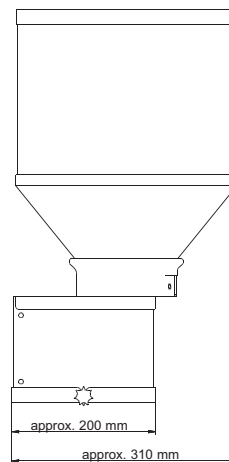

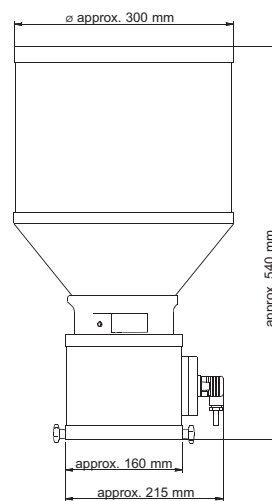

Technical data

Features and equipment

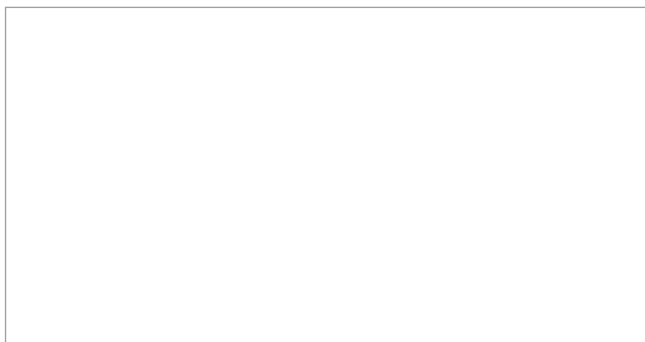

Capacity	approx. 5 L
with top section	approx. 20 L
Power supply	230 V
Dosing speed	max. approx. 80 ml/min
Clock pulse control	ON approx. 1-8 sec
	OFF approx. 1-8 sec
Height	approx. 540 mm
Width	approx. 306 mm
Depth	approx. 215 mm

Accessories

Mounting clamps	ø 57 - 63 mm
	ø 48 - 53 mm
	ø 40 - 43 mm
