# CalfCloud

Heavenly views for your calves!

Each Smart calf feeder from Förster-Technik is equipped with an Ethernet interface. Through a LAN-cable your calf feeder can be connected with an Internet router and the CalfCloud within minutes.

Your benefits:

- A simple dashboard with all information on the machine and calves
- In combination with the free CalfApp GO! on your smartphone, you can be directly informed about malfunctions and warnings
- Records of every calf with all information as a graphic
- Feeding plans and settings of the calf feeder
- Clearly arranged calf list with sort and filter option
- List of alarms and records
- Automatic daily data backup
- Update to the latest software version via Cloud
- Remote maintenance via service token
- Automatic time setting
- Combination with other data of the Smart Neckband, the 1-2-3 animal scale, the Smart Water Station, the concentrate feeder etc.

Create a free user account on www.calf-cloud.com to get a great overview of all your data - with every browser and any device you choose, no matter if PC or Smartphone.

Take advantage of this modern and simple way to manage your animals and devices easily and from anywhere.
