

# CalfCloud

## Heavenly views for your calves!

Each Smart calf feeder from Förster-Technik is equipped with an Ethernet interface. Through a LAN-cable or wirelessly with the optional Wi-Fi box your calf feeder can be connected with an Internet router and the CalfCloud within minutes.

Your benefits:

- Automatic daily data backup
- Update the latest software via Cloud
- Automatic time setting

**Create a free user account on [www.calf-cloud.com](http://www.calf-cloud.com) and you have a great overview of all your data - with every browser and any device you choose, PC or Smartphone.**

- A simple dashboard with all information on the machine and calves
- Clearly arranged calf list with sort and filter option
- Records of every calf with all information as a graphic
- List of alarms and records
- Feeding plans and settings of the calf feeder
- Remote maintenance via service token
- In combination with the free CalfApp on your smartphone, you can be directly informed about disturbances and warnings
- Combination with other data of the Smart Calf System from Förster-Technik like SmartNeckband, 1-2-3-animal scale, etc.

Take advantage of this modern and simple way to manage your animals and devices easily and from anywhere. There are no additional costs apart from the Internet costs.
